DEALDOCK / STRATEGY & EXECUTION PLAN

Content strategy, research and November calendar

Brand-led. Faceless. Built around useful creator conversations.
LinkedIn, X, Instagram and Threads only.

Planning period: **6-30 November 2026**
Prepared: **5 November 2026**
Timezone: **Asia/Calcutta (IST)**
Status: **Draft for review**

DealDock is being developed to help Instagram-first commerce creators recognize promising enquiries, prepare replies for human review and track creator-confirmed sales. This plan turns public audience research into practical content and a measurable path to suitable research conversations.

33 proposed posts	4 platforms	32-source register
12 Instagram	8 X + 8 Threads	5 LinkedIn

What is inside

Strategy and positioning / research methods and evidence / community interests / competitor lessons / platform playbooks / weekly calendar / complete post briefs / AI production / conversion and measurement / daily research / clickable source register.

All calendar items are proposals. No social posts have been published or scheduled, and no CRM records have been updated as part of this document.

DEALDOCK / NOVEMBER 2026

The strategy in one page

Message to test: Your next customer might already be in your DMs.

Who the content should attract

Start with Indian coaches and course/cohort creators who already receive recurring commerce enquiries through Instagram. Use international English-language content to test relevance with similar creator businesses abroad. Treat this audience as a hypothesis until first-party evidence supports it.

What content should achieve

Help a suitable creator recognize a familiar problem, learn something useful and request a research walkthrough. The month is an audience-learning and qualification cycle. It does not promise viral reach, paid demand or verified revenue recovery.

Pillar	Useful content	Product connection
Buyer intent	Fit, timing and availability questions	Recognizing relevant conversations
Replies and follow-ups	Accurate answers and respectful next steps	Drafting support with human review
Conversation workflow	Review routines and context handoffs	Keeping attention on unresolved questions
Trust and outcomes	Permissions, approvals and clear estimates	Explaining the intended product honestly

How the pieces work together

One researched situation becomes an Instagram story or checklist, an X observation, a Threads conversation and a LinkedIn workflow explanation. Each post stands alone and uses its platform appropriately. The useful advice stays in the post; additional resources are optional.

Success this month

Judge topic relevance, relevant creator conversations, voluntary walkthrough requests and the effort to produce them. Compare reach, shares and saves within each format. Paid conversion and verified product activation remain separate later outcomes.

DEALDOCK / NOVEMBER 2026

Research method and evidence quality

The source register contains **30 sources gathered earlier in this chat plus 2 additions for this PDF**: official Threads and X guidance. Research combines platform guidance, observational datasets, selected creator examples, public discussions and individual reviews. It is targeted desk research, not a systematic global survey.

Source family	What it informs	What it cannot prove
Official platform guidance	Available tools, metrics and format considerations	Guaranteed distribution or DealDock conversion
Buffer and Metricool	Separate format/engagement observations	Causal algorithm rules or results for this account
Creator vendor stories	Specific content/offer mechanics	Typical results or independent attribution
Reddit and public communities	Language, questions, objections and counterexamples	Population prevalence or verified buyer identity
G2 and Capterra reviews	Usability, support and cost concerns	Current competitor pricing or reliability rates
Tech communities	Distribution lessons and feedback methods	Demand among commerce creators

Cross-check before making a recommendation

Use independent publishers and contradictory examples. Count a vendor case as one selected example, not a market benchmark. Discount founder promotion and affiliate replies. Source dates can differ from page update dates; older evidence is labelled in the register.

Confidence rules

Directional: recurring signals across sources justify a test. **Provisional:** one segment or a small discussion supports a question, not a conclusion. **Unknown:** willingness to pay, account-specific best times, content conversion and regional purchase fit. Do not invent percentages or personas; five independent, consistent-segment observations is a minimum working research target, not a guarantee of validity.

DEALDOCK / NOVEMBER 2026

What the platform evidence supports

Finding	Evidence cross-check	Decision
Different formats serve different jobs	S1 Buffer + S2 Metricool: engagement and discovery are different measures	Test Reels alongside saveable carousels
Useful business explanations matter	S9 Wistia + S10 LinkedIn research + S28 guidance	Use clear demos and practical documents
Conversation is a research input	S1 cross-platform observations + S31 Threads tools	Ask specific questions and review replies manually
Test openings and topics	S3 official Trial Reels + S6 creator example	Try distinct hooks; sequential comparisons are not randomized A/B tests
Brand clarity on X	S32 official business overview + S1 format research	State the audience and purpose, then test concise native posts

Important distinction: reach versus engagement

Buffer reports carousel median engagement per reach above Reels in its Instagram format analysis. A separate older reach analysis favors Reels. Metricool uses a different account sample and time window. These studies support a mixed-format test; their numbers should not be pooled or treated as forecasts. [S1, S2]

Threads is a separate experiment

Official Threads guidance describes topic discovery, conversation controls, link insights and geographic audience insights. Start with natural questions and useful observations, then inspect the account's actual audience. Feature availability and relevance need checking on the brand account. [S31]

What is deliberately not claimed

No fixed algorithm weight, universal best time, trending sound or guaranteed viral format is asserted. Public ad presence does not establish profitability. No authenticated platform analytics or original competitor-post performance inventory was inspected.

DEALDOCK / NOVEMBER 2026

What people discuss and want help with

Audience signal	Sources	Content response
Some coaches need customers before they need inbox software	S18, S19	Distinguish acquisition from enquiry handling
Creators worry about silent conversations and follow-ups	S20, S30	Publish respectful, context-led examples
People value relief from repetitive messaging	S7, S24	Show the actual question a useful response answers
Indian audiences dislike information hidden behind follow/comment gates	S15, S16	Publish the answer openly; optional resource CTA
Costs and support affect tool evaluation	S22, S23, S24	Use a neutral workflow-and-cost checklist
UGC creators discuss good opportunities, scope and pay	S20, S21, S29	Keep this a secondary audience; avoid off-scope feature promises

Audience language to investigate further

Public discussions contain variations of: enquiries that stop replying, uncertainty about following up, difficulty finding worthwhile deals and frustration with repeated copy-paste work. These are paraphrased themes. No phrase here is presented as a verified DealDock customer quote.

Buyer fit

Higher-priority hypothesis: an established creator sells a paid offer and already handles meaningful purchase questions in DMs. **Lower-priority:** entertainment-only audiences, creators with little commercial inbound, or businesses seeking mass outbound and comment automation. Interest in an educational post alone does not establish fit.

DEALDOCK / NOVEMBER 2026

Competitors, communities and global context

Example	Lesson to test	Limit
Manychat / Theresa Dinh [S7]	Useful carousel followed by a relevant resource	Vendor-selected example; no DealDock comment-automation claim
Stan / Creator Strategies [S6]	Recognizable formats, specific hooks and iteration	Audience growth is not SaaS customer acquisition
Stan / Charlie Dadia [S8]	Refine message and offer path rather than only posting more	Single selected creator story
Manychat / Amy Porterfield [S14]	Match content to a specific useful next step	Mixed totals/timeframes; exclude revenue benchmarks
Indie Hackers [S25, S26]	Useful tutorials and direct conversations; distribution can also fail	Founders differ and one case had a large pre-existing audience
Hacker News [S27]	Show a concrete problem and seek relevant feedback	Tech interest must not substitute for buyer evidence

Global research, targeted execution

India: test natural Hinglish narration with English captions against English-only variants in comparable situations. International: use English practical examples and neutral currency where possible. Do not assign country-wide preferences or spending power from these sources. Brazil, Gulf, Europe and other markets need relevant local-language creator evidence before a dedicated campaign.

Community listening map

Monitor relevant coaching, personal-training, Instagram-marketing and UGC discussions; read current rules before participating. Use Hacker News and Indie Hackers for learning and selective partners. Private Facebook, Discord and Skool communities have not been audited. Access and community suitability remain research tasks. No outreach or community posts are executed by this plan.

DEALDOCK / NOVEMBER 2026

Four platform playbooks

Platform	Audience / format	November volume	Primary action
Instagram	Commerce creators; animated Reels, carousels, companion Stories	8 Reels + 4 carousels	Save, share, describe a relevant problem
X	Creator operators and relevant partners; concise observations and examples	8 native posts	Useful replies and relevant profile visits
LinkedIn	Managers, agencies and established coaches; documents, diagrams and brand explanations	5 brand-page posts	Relevant-role conversations and walkthrough requests
Threads	Creator conversation and audience discovery; natural short posts	8 native conversation posts	Specific replies that reveal needs

Identity and accounts

Publish through DealDock brand accounts only. No founder faces, names, profiles, personal stories or personal voice/clones. If a brand account is missing or inaccessible, record the gap and hold the slot. Never default to a personal profile.

Proposed time slots in IST

Instagram Reels 19:30; carousels 12:30. LinkedIn 10:00; X 18:30; Threads 20:00. These are convenient first test slots, not established best times. Compare with actual audience activity before changing the schedule.

One theme, different executions

Theme: an unanswered schedule question. Instagram: animated situation. X: a concise useful observation. LinkedIn: a workflow diagram with implications. Threads: ask which question needs more thought. Carry the idea across platforms while adapting the copy and visual treatment.

DEALDOCK / NOVEMBER 2026

Brand, creative and conversion rules

Faceless creative system

Use approved DealDock assets, editable type, original chat animation, diagrams, illustrations and accurate sample-data recordings. This PDF's green/yellow editorial treatment is a document design, not a newly approved product identity. Generic licensed narration is optional. Do not create a synthetic founder, fake customer or staged testimonial.

Product claims that need care

Local product documents distinguish intended scope from verified readiness. Show sample labels and actual tested actions. Do not promise live Instagram delivery, automatic voice learning, audio workflows or verified recovery before their checks pass. Label estimated opportunity separately from creator-confirmed sales. Never imply a fictional message is real customer evidence.

Conversion path

> Useful post > relevant interaction > verified DealDock contact route > qualification conversation > sample-data walkthrough > readiness-gated pilot.

Before a walkthrough CTA, verify the contact link and response owner. Ask what the creator sells, whether purchase questions already arrive, what the existing process does well and what becomes difficult. Do not request private inbox exports or credentials. Track source post ID and a voluntary discovery-source answer.

Distribution and response

For Instagram, add a companion Story that summarizes the useful takeaway and asks one relevant question. For the other platforms, answer useful comments manually in the brand voice. Do not manufacture engagement, send unsolicited prospect messages or force follows to reveal the answer. A proposed cross-platform adaptation is still a draft until approved.

DEALDOCK / NOVEMBER 2026

Calendar / 6-8 November

All items are drafts for DealDock brand accounts. Detailed copy follows the calendar. Use the post ID when naming assets and tracking enquiries.

Date / ID	Platform	Post / format
06 Nov / IG01	Instagram	Your Reel went viral. Your buyer is still waiting. (Reel)
07 Nov / IG02	Instagram	5 DMs worth a second look (Carousel)

Preparation before the first post

• Confirm brand accounts, approved assets and a working contact route.

• Prepare one reusable chat-animation frame and one carousel template.

• Check that the first fictional scenario is labelled and captions are readable.

• Review product statements and publish only after owner approval.

Test slots: Reels 19:30; carousels 12:30; LinkedIn 10:00; X 18:30; Threads 20:00. All IST.

DEALDOCK / NOVEMBER 2026

Calendar / 9-15 November

All items are drafts for DealDock brand accounts. Detailed copy follows the calendar. Use the post ID when naming assets and tracking enquiries.

Date / ID	Platform	Post / format
09 Nov / TH01	Threads	The hardest DM is often the one you need to think about. (Conversation post)
09 Nov / X01	X	A follow is not a buying signal. (Native text)
10 Nov / IG03	Instagram	'Price?' does not tell you the whole story. (Reel)
11 Nov / LI01	LinkedIn	What happens after a creator receives an enquiry? (Workflow diagram)
12 Nov / IG04	Instagram	Coach ho ya full-time link bhejne wale? (Reel)
12 Nov / TH02	Threads	A tiny inbox habit to try. (Conversation post)
12 Nov / X02	X	A useful follow-up adds context. (Native text)
14 Nov / IG05	Instagram	A follow-up that adds something useful (Carousel)

Review and preparation

Review on 15 November. Check comparable windows and relevant audience responses. Replace a weak or outdated slot with a better-supported topic; record the reason rather than silently rewriting approved work.

Test slots: Reels 19:30; carousels 12:30; LinkedIn 10:00; X 18:30; Threads 20:00. All IST.

DEALDOCK / NOVEMBER 2026

Calendar / 16-22 November

All items are drafts for DealDock brand accounts. Detailed copy follows the calendar. Use the post ID when naming assets and tracking enquiries.

Date / ID	Platform	Post / format
16 Nov / LI02	LinkedIn	An enquiry-handling tool needs the right customer. (Native brand text)
16 Nov / TH03	Threads	Some people need more enquiries. Others need a better way to handle them. (Conversation post)
16 Nov / X03	X	An inbox tool needs the right customer. (Native text)
17 Nov / IG06	Instagram	A follow is not a coaching enquiry. (Reel)
18 Nov / LI03	LinkedIn	A handoff checklist for a creator and an assistant (Six-page native document)
19 Nov / IG07	Instagram	Would you approve this AI reply? (Reel)
19 Nov / TH04	Threads	Would you want every AI-written message approved first? (Conversation post)
19 Nov / X04	X	A fluent AI reply can make the wrong promise. (Native text)
21 Nov / IG08	Instagram	When they say: 'I need to think about it' (Carousel)

Review and preparation

Review on 22 November. Check comparable windows and relevant audience responses. Replace a weak or outdated slot with a better-supported topic; record the reason rather than silently rewriting approved work.

Test slots: Reels 19:30; carousels 12:30; LinkedIn 10:00; X 18:30; Threads 20:00. All IST.

DEALDOCK / NOVEMBER 2026

Calendar / 23-30 November

All items are drafts for DealDock brand accounts. Detailed copy follows the calendar. Use the post ID when naming assets and tracking enquiries.

Date / ID	Platform	Post / format
23 Nov / TH05	Threads	Sometimes the useful reply is two sentences. (Conversation post)
23 Nov / X05	X	Give the useful answer in the post. (Native text)
24 Nov / IG09	Instagram	You remember the likes. Do you remember the enquiry? (Reel)
25 Nov / LI04	LinkedIn	Keep estimated opportunity separate from confirmed sales. (Labelled sample-data diagram)
26 Nov / IG10	Instagram	Potential deal and confirmed sale are different numbers. (Reel)
26 Nov / TH06	Threads	Following up feels easier when you have something useful to add. (Conversation post)
26 Nov / X06	X	An estimate should never look like a receipt. (Native text)
27 Nov / X07	X	Evaluate the workflow before the feature count. (Native text)
28 Nov / IG11	Instagram	Will an inbox tool be worth paying for? (Carousel)
28 Nov / TH07	Threads	Good software should make the next action clearer. (Conversation post)
30 Nov / IG12	Instagram	Is DealDock being built for your kind of inbox? (Reel)
30 Nov / LI05	LinkedIn	What should an inbox tool prove before you pay for it? (Native brand text + checklist)
30 Nov / TH08	Threads	We are collecting questions from creators who sell through DMs. (Conversation post)
30 Nov / X08	X	What should we investigate next? (Native text)

Review and preparation

Review on 29 November, with month-end reconciliation on 30 November. Check comparable windows and relevant audience responses. Replace a weak or outdated slot with a better-supported topic; record the reason rather than silently rewriting approved work.

Test slots: Reels 19:30; carousels 12:30; LinkedIn 10:00; X 18:30; Threads 20:00. All IST.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 1-2

IG01 / 06 Nov / Reel

Your Reel went viral. Your buyer is still waiting.

0-3s: an animated view counter rises. 3-9s: fictional DM: Can I join your next batch? 9-16s: reactions push the question down. 16-23s: Content starts conversations. Your inbox routine needs to keep them moving. Keep Illustrative scenario visible.

Caption: A useful question can disappear in a busy inbox. A simple review routine gives it another look. Illustrative scenario.

CTA: Share with a creator who handles their own inbox.
Measure: Shares/reach
Evidence: S1 S2 S6

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

IG02 / 07 Nov / Carousel

5 DMs worth a second look

1: 5 DMs worth a second look. 2: Can I join this month? Timing question. 3: Is this suitable for beginners? Fit question. 4: Do you have weekend slots? Availability question. 5: What is included? Evaluation question. 6: Can I speak to someone before joining? Next-step question. 7: These are clues, not proof of a sale. Answer the question before assuming intent.

Caption: A specific question deserves a specific answer. Use these examples during your next inbox review.

CTA: Save this checklist.
Measure: Saves/reach
Evidence: S1 S2 S7

Production: Use a value-stack or practical checklist layout. Render the listed slides with editable type at 1080 x 1350. One idea per slide; examples clearly illustrative.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 3-4

IG03 / 10 Nov / Reel

'Price?' does not tell you the whole story.

0-3s: Price? fills the frame. 3-10s: show three fictional continuations: Just comparing; Does it include feedback?; Can I start Monday? 10-21s: The first message does not tell you the whole story. Answer clearly and ask a relevant question. 21-25s: Interest is not a confirmed purchase.

Caption: Give the price accurately. Help the person understand fit without turning every question into pressure.

CTA: What question usually comes after price?
Measure: Relevant comments
Evidence: S8 S19

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

IG04 / 12 Nov / Reel

Coach ho ya full-time link bhejne wale?

0-3s: hook in editable type. 3-9s: creator copies a program link into a fictional chat. 9-17s: buyer asks: Will it fit my night-shift schedule? 17-25s: Link bhejna easy hai. Sahi sawaal ka jawab dena matters. Show a useful schedule answer, using fictional offer details.

Caption: Your program link helps. A relevant answer helps the person decide. All messages are illustrative.

CTA: Which question do you answer repeatedly?
Measure: Relevant replies
Evidence: S7 S8 S24

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 5-6

IG05 / 14 Nov / Carousel

A follow-up that adds something useful

1: A useful follow-up adds context. 2: Recall the question they asked. 3: Answer what was missing. 4: Offer one next step. 5: Example: You asked about timing. Here is the weekly schedule. Happy to clarify anything. 6: Respect their answer and stop if they decline. Check current platform permissions before messaging.

Caption: Follow-up is easier when you have something useful to add. Adapt this example to the actual conversation.

CTA: Save the framework.
Measure: Saves/reach
Evidence: S17 S20 S30

Production: Use a value-stack or practical checklist layout. Render the listed slides with editable type at 1080 x 1350. One idea per slide; examples clearly illustrative.

IG06 / 17 Nov / Reel

A follow is not a coaching enquiry.

0-3s: Followed you notification. 3-10s: fictional viewer saves one fitness tip. 10-18s: a different person asks about joining a paid program. 18-25s: Both matter. Only one has asked about buying. Give each person the response they actually invited.

Caption: Build trust with people who enjoy your content. Handle purchase questions with accurate, useful answers.

CTA: What signals genuine interest in your offer?
Measure: Relevant replies
Evidence: S17 S18 S19

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 7-8

IG07 / 19 Nov / Reel

Would you approve this AI reply?

0-3s: fictional draft says: You can start tomorrow. 3-10s: a sample schedule shows the next cohort starts next month. 10-18s: approval pauses; draft is corrected. 18-25s: Fluent words can still contain the wrong promise. Human review matters. Use an original diagram unless this exact demo action is verified.

Caption: Dates, availability and promises deserve a human check. Proposed workflow shown with fictional data.

CTA: Which detail would you check before sending?
Measure: Qualified profile visits
Evidence: S9 S10 S13

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

IG08 / 21 Nov / Carousel

When they say: 'I need to think about it'

1: Give people room to decide. 2: Do not guess why they are hesitant. 3: Ask whether there is a question you can clarify. 4: Explain fit, schedule or support accurately. 5: Example: Of course. Is there anything about the program you would like me to clarify? 6: Accept no. A respectful conversation does not guarantee a sale.

Caption: An unresolved question and a polite decline need different responses. Ask once, listen and respect the answer.

CTA: Save the response example.
Measure: Saves/reach
Evidence: S17 S19 S8

Production: Use a value-stack or practical checklist layout. Render the listed slides with editable type at 1080 x 1350. One idea per slide; examples clearly illustrative.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 9-10

IG09 / 24 Nov / Reel

You remember the likes. Do you remember the enquiry?

0-3s: like counter on an illustrated phone. 3-11s: fictional creator celebrates a post; an offer question remains unanswered. 11-21s: Give enquiry review a place in the workday. Start with questions that need an answer, rather than guessing how much money was lost. 21-25s: Illustrative scenario label.

Caption: Content creation and enquiry handling are two parts of the same business routine.

CTA: Share with someone running everything alone.
Measure: Shares/reach
Evidence: S2 S6 S8

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

IG10 / 26 Nov / Reel

Potential deal and confirmed sale are different numbers.

0-3s: two clearly named columns. 3-11s: sample enquiry enters Estimated opportunity. 11-18s: show that no purchase has been confirmed. 18-25s: Estimates may help prioritize attention. Confirmed sales need confirmation. Use a verified sample-data view or a clearly labelled explanatory diagram.

Caption: A promising message is still a conversation. Keep estimates and confirmed outcomes visibly separate.

CTA: What information makes an estimate useful to you?
Measure: Qualified enquiries
Evidence: S9 S10 S13

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

DEALDOCK / NOVEMBER 2026

Instagram production briefs / 11-12

IG11 / 28 Nov / Carousel

Will an inbox tool be worth paying for?

1: Evaluate the workflow before the feature list. 2: Do you already receive relevant enquiries? 3: What repeated work needs help? 4: What is the full cost at your usage? 5: Who approves replies and helps if a connection fails? 6: Run a small real-workflow test. Compare with your current free or manual process.

Caption: A tool should fit the problem you actually have. This is a neutral evaluation checklist, not a competitor price comparison.

CTA: Save before comparing tools.
Measure: Saves and qualified visits
Evidence: S18 S22 S23 S24

Production: Use a value-stack or practical checklist layout. Render the listed slides with editable type at 1080 x 1350. One idea per slide; examples clearly illustrative.

IG12 / 30 Nov / Reel

Is DealDock being built for your kind of inbox?

0-3s: Do you sell coaching or courses through Instagram DMs? 3-10s: We are researching how creators handle enquiries and follow-ups. 10-19s: show one verified local sample-data workflow. 19-25s: Request a research walkthrough and tell us what is missing. If the demo is unavailable, use a labelled concept storyboard.

Caption: DealDock is being built around commerce conversations, creator control and clear outcomes. Research walkthroughs use sample data; pilot access depends on readiness.

CTA: Use the verified DealDock contact route to request a walkthrough.
Measure: Qualified walkthrough requests
Evidence: S7 S9 S10

Production: Build editable message bubbles and captions; use original illustrated UI. 1080 x 1920, 20-30 seconds. Use verified demo recordings only where the brief permits.

DEALDOCK / NOVEMBER 2026

X ready-to-edit copy / 1-4

X01 / 09 Nov / Native text

A follow is not a buying signal.

Someone may like a free tip without wanting coaching. A question about joining the next cohort is different. Respond to what was asked.

Close: What makes you take an enquiry seriously?
Evidence: S17 S18 S19

X02 / 12 Nov / Native text

A useful follow-up adds context.

If someone asked about timing, answer with the schedule. Another nudge without new information may just add noise.

Close: Which question comes up most for your offer?
Evidence: S20 S30

X03 / 16 Nov / Native text

An inbox tool needs the right customer.

If relevant purchase questions rarely arrive, a clearer offer or distribution may matter more than software. DealDock is being researched for existing commerce conversations.

Close: What does your current inbox need?
Evidence: S18 S19 S25

X04 / 19 Nov / Native text

A fluent AI reply can make the wrong promise.

An old price or a full cohort still needs checking. DealDock is being designed around human approval.

Close: Which detail would you always review?
Evidence: S9 S10 S13

DEALDOCK / NOVEMBER 2026

X ready-to-edit copy / 5-8

X05 / 23 Nov / Native text

Give the useful answer in the post.

People should learn something without a mandatory follow or keyword. We are testing complete reply examples with deeper resources as an optional next step.

Close: What information should be shared openly?
Evidence: S15 S16 S7

X06 / 26 Nov / Native text

An estimate should never look like a receipt.

A promising enquiry is not a confirmed sale. Estimates may help prioritize attention; they do not prove revenue was recovered.

Close: What would make an opportunity estimate useful?
Evidence: S9 S10 S13

X07 / 27 Nov / Native text

Evaluate the workflow before the feature count.

Check what an inbox tool can access, who approves messages, the full cost and the support path. Compare one real task with your current process.

Close: Save these checks for your next evaluation.
Evidence: S22 S23 S24

X08 / 30 Nov / Native text

What should we investigate next?

We are researching how Instagram-selling coaches and course creators handle enquiries after someone asks for details.

Close: What becomes difficult after the first question?
Evidence: S1 S25 S27

DEALDOCK / NOVEMBER 2026

Threads ready-to-edit copy / 1-4

TH01 / 09 Nov / Conversation post

The hardest DM is often the one you need to think about.

You know the answer to the price question. The one about whether your program fits someone's unusual schedule takes more care. Those are the conversations worth making time for.

Close: Which question makes you pause before replying?
Evidence: S8 S19 S31

TH02 / 12 Nov / Conversation post

A tiny inbox habit to try.

Before opening the content planner, look for one relevant question you have not answered. Handle that conversation, then return to making the next post. This is a workflow suggestion, not a claim that every unread message is a customer.

Close: What helps you return to unfinished conversations?
Evidence: S20 S24 S31

TH03 / 16 Nov / Conversation post

Some people need more enquiries. Others need a better way to handle them.

Those are different business problems. An inbox tool only makes sense when there is an inbox workflow that needs help.

Close: Which side describes your business right now?
Evidence: S18 S19 S25

TH04 / 19 Nov / Conversation post

Would you want every AI-written message approved first?

A draft can help with wording. A human still knows whether the cohort is full or the offer changed. We are exploring how to keep that check clear and quick.

Close: What would you always want control over?
Evidence: S9 S10 S31

DEALDOCK / NOVEMBER 2026

Threads ready-to-edit copy / 5-8

TH05 / 23 Nov / Conversation post

Sometimes the useful reply is two sentences.

Answer the question. Add the relevant detail. Give the person space to decide. A bigger paragraph does not automatically make the conversation more helpful.

Close: What reply has genuinely helped you make a purchase decision?
Evidence: S8 S17 S19

TH06 / 26 Nov / Conversation post

Following up feels easier when you have something useful to add.

A corrected date, the schedule someone requested, or a clear answer to a question can be more useful than another reminder. Keep the conversation welcome and respect the platform's messaging limits.

Close: What makes a follow-up feel considerate to you?
Evidence: S20 S30 S31

TH07 / 28 Nov / Conversation post

Good software should make the next action clearer.

For a busy creator, that may mean knowing which question needs attention and what information is missing. More notifications are not necessarily more help.

Close: What would make your inbox feel easier to manage?
Evidence: S20 S24 S31

TH08 / 30 Nov / Conversation post

We are collecting questions from creators who sell through DMs.

Coaching, courses, cohorts or another paid offer: what gets difficult after someone asks for details? Please describe the situation without sharing private messages.

Close: A research walkthrough can be requested through the verified DealDock contact route.
Evidence: S19 S20 S31

DEALDOCK / NOVEMBER 2026

LinkedIn ready-to-edit copy / 1-2

LI01 / 11 Nov / Workflow diagram

What happens after a creator receives an enquiry?

Content brings people into a conversation. Someone still needs to understand the question, answer accurately and return to it when more information is needed.

For a coach selling a cohort, that can mean checking fit, explaining the schedule and making sure a promise matches the actual offer. A program link alone may not settle those questions.

DealDock is being built around this part of the workflow. The product hypothesis is that creators with recurring commerce enquiries need clearer attention and review, alongside useful drafting support.

This is a product under validation. A possible opportunity is not a confirmed sale.

Close: What part of handling enquiries takes the most judgment in your business?
Evidence: S8 S9 S10

LI02 / 16 Nov / Native brand text

An enquiry-handling tool needs the right customer.

Creators face different problems. Some need a clearer offer or more relevant distribution. Others already receive serious enquiries and struggle to keep the conversations moving.

Those situations should not lead to the same software recommendation.

Before a DealDock research walkthrough, the useful questions are practical: What do you sell? Do purchase questions already arrive in Instagram DMs? What becomes difficult after the first question? What does your current routine handle well?

If the existing routine is sufficient, that is a useful result of the conversation.

Close: Which part of your current enquiry process would you change first?
Evidence: S18 S19 S25

LI03 / 18 Nov / Six-page native document

A handoff checklist for a creator and an assistant

When someone else helps with the inbox, the next reply needs context. A simple handoff can include:

1. The question the person actually asked.
2. Accurate offer details and availability.
3. Any promise already made.
4. The person responsible for the next response.
5. Who reviews the message before sending.
6. Whether a completed sale has actually been confirmed.

This is a practical operating checklist, not a claim that every collaboration feature is live in DealDock.

Close: Save the checklist and adapt it to your existing process.
Evidence: S9 S10 S24

LI04 / 25 Nov / Labelled sample-data diagram

Keep estimated opportunity separate from confirmed sales.

A revenue-focused tool needs to make uncertainty understandable. A conversation can look promising before someone decides to purchase.

If a value is estimated, label it as estimated. If a sale is confirmed by the creator, show that as a distinct outcome. Neither an unread message nor an estimate proves revenue was lost or recovered.

DealDock demonstrations should make this distinction visible. Any example shown before live validation uses clearly labelled sample data.

Close: What evidence would make an opportunity estimate useful in your reporting?
Evidence: S9 S10 S13

DEALDOCK / NOVEMBER 2026

LinkedIn ready-to-edit copy / 5-5

LI05 / 30 Nov / Native brand text + checklist

What should an inbox tool prove before you pay for it?

Start with one task you already do: recognizing a relevant enquiry, preparing an accurate response or returning to an unfinished conversation.

Compare the proposed tool with your existing workflow. Include the time to review drafts, the full cost, control over messages and what happens when the connection needs attention.

For DealDock, the next step is research with suitable creators and readiness-gated walkthroughs. A polished demonstration is an explanation of a workflow; live usefulness still needs evidence.

Close: Creators already selling through Instagram DMs can request a research walkthrough through the verified DealDock contact route.

DEALDOCK / NOVEMBER 2026

AI production and operating workflow

Step	Execution	Human review
1 / Evidence	Select a real audience question and log source/date/segment	Check fit, context, bias and counterexamples
2 / Brief	Choose one point, platform, hook, useful payoff and CTA	Confirm the promise is accurate
3 / Build	Animate chat UI; render slides; record verified sample actions	Check labels, legibility and product truth
4 / Audio	Optional authorized generic Hindi/English narration	Check pronunciation and commercial permissions
5 / Adapt	Reframe the same theme for each platform	Each version must make sense alone
6 / Review	Mobile preview, caption, link and claim checks	Approve before publishing
7 / Learn	Record performance and actual relevant questions	Change one clear variable next time

Reusable production prompt

Create an original, faceless DealDock asset from this approved brief. Keep the exact useful message and CTA. Use editable text and fictional labelled conversations; do not invent customers, results, features or founder appearances. Use verified footage for actual product demonstrations. Provide captions, a mobile-safe composition and a version adapted to the specified platform.

Effort and spending assumptions

Plan approximately 6-9 human hours weekly after template setup, plus extra time for initial assets and research. This is an unmeasured planning estimate. Reuse the research and design system rather than making every asset from scratch. A working generation budget of USD 30-60 for the month is a proposal, not authorized spend or an all-in cost.

Illustrative optional B-roll cost: 8 Reels x one 5-second clip x three attempts x USD 0.05/second = USD 6 at the checked Gen-4 Turbo API rate. Editing, narration, images, taxes, labour and subscriptions are excluded; verify rates before purchase. [S11, S12]

DEALDOCK / NOVEMBER 2026

Measurement and monthly decisions

Platform	Attention / usefulness	Business signal
Instagram	Reach, non-follower reach where available, watch time, shares/reach, saves/reach	Relevant profile visits and creator enquiries
X	Impressions, relevant replies, profile visits where available	Creator/operator conversations and requested next steps
LinkedIn	Impressions, useful comments and relevant roles	Suitable creator-manager or agency enquiries
Threads	Views, relevant replies, link insights where available	Relevant creator conversations, not raw reply volume

Use matching windows and denominators

Capture 48-hour and seven-day snapshots. Compare formats separately. Do not mix reach-based and view-based rates. Track conversations by source post ID and voluntary attribution. A walkthrough request is not an activated customer. A sale should not be causally attributed to a post without supporting evidence.

Review questions

• Who responded, and do they fit the buyer hypothesis?

• Which topic generated useful questions or requests?

• Did a post earn attention without attracting relevant people?

• Which production format is practical to repeat?

• What single change should the next batch test?

After at least four comparable posts, use series medians to identify candidates. A planning trigger such as 1.5x the format median is a heuristic, not statistical significance. Low exposure means the result is inconclusive. End-month seven-day data will be incomplete for late-November posts; reconcile those in December.

DEALDOCK / NOVEMBER 2026

Daily research and the remaining gaps

The scheduled research starts daily at **23:00 IST**. Instructions require at least 10 minutes of substantive investigation and recording actual duration; a tool/runtime shortfall must be reported honestly. Reports are saved to the project research directory, with an evidence register, history and prioritized gap backlog.

Priority	Research question	Next evidence needed
P0	Do suitable creators experience a recurring problem worth solving?	Voluntary conversations with creators already selling through DMs; document current workflow
P0	Can the current product demonstrate the promised workflow?	Readiness checks and verified, sample-data demonstrations
P0	Are brand profiles and the contact route ready?	Owner access and account/link verification; hold affected slots until ready
P1	Which topics and languages attract the right people?	Platform analytics and observed audience responses
P1	What would suitable users pay for and why?	First-party willingness-to-pay and alternative-workflow discussions
P1	Which competitor posts actually show durable audience response?	Bounded original-post sample with dates, format, metrics and context
P2	Which international segments and private communities fit?	Local-language evidence and authorized access; avoid geography-wide assumptions

Each nightly report

New evidence with URLs, audience interests, contradictions, confidence and limitations; 3-5 prioritized ideas; at least two platform-specific production briefs; suggested calendar changes; research gaps and owner actions. Sundays add a rolling 14-day proposal.

Approval and handoff

Research and drafting are authorized. CRM updates, publishing and prospect messages remain pending separate approval. The CRM endpoint previously required project-scoped authentication; no credentials belong in a report. The new marketing skills organize the workflow but are not empirical research sources.

DEALDOCK / NOVEMBER 2026

Research source register / 1

Source IDs connect the research and calendar briefs. Links are clickable. References may describe earlier periods; a recent page update is not necessarily a recent experiment. Background YouTube sources remain in the research history only; YouTube is excluded from this publishing plan.

S1 / Buffer 2026 engagement research

2026 report; data largely describes 2025. Carousels have higher median engagement per reach than Reels. Separate older reach analysis favors Reels. Different metrics and time windows; do not combine into a causal rule.

https://buffer.com/resources/state-of-social-media-engagement-2026/

S2 / Metricool 2026 Instagram study

24.3 million posts across 375,118 accounts, Jan-Feb 2025 vs Jan-Feb 2026. Supports differentiated roles for Reels, carousels and Stories. Observational sample of managed accounts, not a DealDock forecast.

https://metricool.com/press-release-instagram-study-2026/

S3 / Meta Trial Reels

Official feature guidance. Test non-follower response where available. Early insight is not a controlled randomized A/B experiment.

https://about.fb.com/news/2024/12/trial-reels-try-content-non-followers-first-see-what-perfoms-best/

S4 / YouTube Shorts discovery

Official guidance: viewer choice, retention and personalization affect recommendations; no minimum posting cadence.

https://support.google.com/youtube/answer/11914225?co=YOUTUBE._YTVideoType%3Dshorts&hl=en

S5 / YouTube Studio Trends

Official research workflow: searches, breakout videos and content gaps. Availability varies; no account-specific dashboard inspected in this research.

https://support.google.com/youtube/answer/11962757?hl=en

S6 / Stan Creator Strategies experiment

Vendor-reported faceless account growth and hook/retention iteration. Page updated Sep 2026 but body describes a 2025 experiment. Growth is not SaaS customer acquisition; do not copy follower targets.

https://stan.store/blog/creator-strategies-case-study/

DEALDOCK / NOVEMBER 2026

Research source register / 2

Source IDs connect the research and calendar briefs. Links are clickable. References may describe earlier periods; a recent page update is not necessarily a recent experiment. Background YouTube sources remain in the research history only; YouTube is excluded from this publishing plan.

S7 / Manychat Theresa Dinh case

Vendor-reported creator example: useful carousel, relevant resource and an explicit next step. Borrow useful content-to-resource sequencing. Comment automation is not a DealDock capability.

https://manychat.com/blog/success-stories/theresa-dinh/

S8 / Stan Charlie Dadia case

Creator example emphasizing message/funnel refinement after a long period of frequent posting. Selected vendor success story, not independent causal evidence.

https://stan.store/blog/charlie-dadia/

S9 / Wistia 2026 State of Video

900+ professionals and 13M+ hosted videos. Product and educational videos matter in its business-video sample. Does not establish Instagram virality or the best channel for Indian creators.

https://wistia.com/blog/video-marketing-statistics

S10 / LinkedIn Ipsos B2B benchmark

2025 survey of 1,500 B2B marketers across six countries including India. Directional support for credible human-led content; larger-company sample limits applicability.

https://www.linkedin.com/business/marketing/blog/marketing-collective/2025-b2b-marketing-benchmar-the-video-influence-effect-starts-with-trust

S11 / ElevenLabs speech documentation

Hindi and English supported. Mixed-language pronunciation and commercial usage terms still need checks for the selected voice and plan.

https://elevenlabs.io/docs/overview/capabilities/text-to-speech

S12 / Runway API pricing

Gen-4 Turbo listed at 5 credits/second and credits at $0.01 on 5 Nov 2026. API credits differ from app subscriptions; retries, tax, voice and editing add costs.

https://docs.dev.runwayml.com/guides/pricing/
